

Where to find COVID-19 information

Some places for COVID-19 information have recently changed. Here is a new list of advice and information resources for COVID-19 to support your patients or clients.

Online

For COVID-19 health advice, Healthdirect Australia is the best place to start. They provide general information on testing, symptoms, long COVID, and what to do if you have COVID-19.

To keep the link handy, bookmark www.healthdirect.gov.au/covid-19 on your web browser.

For translated resources visit www.health.gov.au/topics/covid-19/translated-information

Get a COVID-19 Vaccination

Service Finder can help to locate COVID-19 vaccine providers in Australia.

People living in Australia can compare clinics, check availability and book an appointment all in one place.

The Service Finder, available in 15 languages, provides access to more than 300,000 other healthcare services, including COVID-19 vaccination.

Find and book your next COVID-19 vaccination. www.healthdirect.gov.au/australian-health-services

Feeling unwell and need advice?

Healthdirect has information on symptoms, isolation, medications and recovery.

People experiencing COVID-19 symptoms can use the Symptom Checker to help decide what to do next. www.healthdirect.gov.au/symptom-checker

If someone feels very unwell or needs COVID-19 advice for a person in their care, we encourage talking with a health professional right away.

If a person is unsure if they need to see a health professional, they can speak with a nurse, by calling the healthdirect helpline on 1800 022 222. The helpline is available 24 hours, 7 days a week and has free interpreting help.
