9:50 AM	Opening Keynote, Dr James Muecke AM, What's Driving Australia's Chronic Disease Crisis? For 50 years we've been told that a high-carb low fat diet is the best approach for our health. We've duly obeyed. And yet... we've only become weightier and sicker. How can it be that real food such as eggs, full fat dairy and red meat have become demonized and industrially created 'foods' such as refined carbohydrates, polyunsaturated seed oils and highly processed edible substances are now celebrated? In this confronting keynote presentation, Dr Muecke will outline the religious ideology and commercial interests driving Australia's chronic disease crisis.
